INTRODUCTION

Foreword - Important notice regarding equipment servicing

All repair and maintenance work listed in this manual must be carried out only by qualified dealership personnel, strictly complying with the instructions given, and using, whenever possible, the special tools.

Anyone who performs repair and maintenance operations without complying with the procedures provided herein shall be responsible for any subsequent damages.

The manufacturer and all the organizations of its distribution chain, including - without limitation - national, regional, or local dealers, reject any responsibility for damages caused by parts and/or components not approved by the manufacturer, including those used for the servicing or repair of the product manufactured or marketed by the manufacturer. In any case, no warranty is given or attributed on the product manufactured or marketed by the manufacturer in case of damages caused by parts and/or components not approved by the manufacturer.

The manufacturer reserves the right to make improvements in design and changes in specifications at any time without notice and without incurring any obligation to install them on units previously sold. Specifications, descriptions, and illustrative material herein are as accurate as known at time of publication but are subject to change without notice.

In case of questions, refer to your NEW HOLLAND CONSTRUCTION Sales and Service Networks.

Safety rules

Personal safety

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible death or injury.

Throughout this manual you will find the signal words DANGER, WARNING, and CAUTION followed by special instructions. These precautions are intended for the personal safety of you and those working with you.

Read and understand all the safety messages in this manual before you operate or service the machine.

DANGER indicates a hazardous situation that, if not avoided, will result in death or serious injury.

WARNING indicates a hazardous situation that, if not avoided, could result in death or serious injury.

CAUTION indicates a hazardous situation that, if not avoided, could result in minor or moderate injury.

FAILURE TO FOLLOW DANGER, WARNING, AND CAUTION MESSAGES COULD RESULT IN DEATH OR SERIOUS INJURY.

Machine safety

NOTICE: *Notice indicates a situation that, if not avoided, could result in machine or property damage.*

Throughout this manual you will find the signal word Notice followed by special instructions to prevent machine or property damage. The word Notice is used to address practices not related to personal safety.

Information

NOTE: *Note indicates additional information that clarifies steps, procedures, or other information in this manual.*

Throughout this manual you will find the word Note followed by additional information about a step, procedure, or other information in the manual. The word Note is not intended to address personal safety or property damage.

Safety rules - General information

Cleaning

Clean the metal parts with cleaning solution that meets the standard and steam cleaning. (except for bearings)

After cleaning, dry well, and inject oil in all parts.

Also inject oil into the bearings after drying.

Inspection

When disassembling parts, check all the parts.

If there are any worn or damaged parts, replace them.

Inspect carefully to prevent initial breakdowns.

Bearing

Replace any loose bearings.

Air dry bearings before installing them.

Needle bearing

When inserting needle bearings, be very careful not to damage them.

Apply grease to the section where the needle bearing will be inserted.

Gear

Check that there is no wear and no damage.

Oil seal, O-ring, gasket

Always install new oil seals, O-rings, and gaskets.

Apply grease to sections where oil seals and O-rings will be inserted.

Shaft

Check that there is no wear and no damage.

Check the bearings and check for damaged oil seals on the shaft.

Service parts

Install NEW HOLLAND CONSTRUCTION genuine service parts.

When placing an order, check the parts catalog. It contains the NEW HOLLAND CONSTRUCTION genuine part numbers.

Any breakdowns arising from the installation of non-genuine parts are not covered by the warranty.

Lubricants (fuel, hydraulic oil)

Use the oil from the specified company or specified in the operator's manual or service Manual.

Any breakdowns arising from any fuel or hydraulic oil other than those specified are not covered by the warranty.

Safety rules - Personal safety

Preliminary warnings to maintenance operation

⚠ WARNING

Avoid injury!
Shut off the engine, remove the key, and make sure all machine motion stops before you service the machine.
Failure to comply could result in death or serious injury.

W1128B

⚠ WARNING

Improper operation or service of this machine can result in an accident.
Assign a supervisor to direct worksite operations. Agree on all safety measures, procedures, and suitable hand signals.
Failure to comply could result in death or serious injury.

W0287A

⚠ CAUTION

Pinch hazard!
Always use suitable tools to align mating parts. DO NOT use your hand or fingers.
Failure to comply could result in minor or moderate injury.

C0044A

Personal Protective Equipment (PPE)

⚠ WARNING

Avoid injury!
Use Personal Protective Equipment (PPE), including protective goggles, gloves, and safety footwear.
Failure to comply could result in death or serious injury.

W1036A

Lifting operation

⚠ WARNING

Crushing hazard!
The lifting systems must be operated by qualified personnel who are aware of the correct procedures to follow. Make sure all lifting equipment is in good condition, and all hooks are equipped with safety latches.
Failure to comply could result in death or serious injury.

W0256A

⚠ WARNING

Heavy objects!
Lift and handle all heavy components using lifting equipment with adequate capacity. Always support units or parts with suitable slings or hooks. Make sure the work area is clear of all bystanders.
Failure to comply could result in death or serious injury.

W0398A

⚠ WARNING

Improper operation or service of this machine can result in an accident.
Raised equipment or machine movement without an operator can cause serious injury. Always do the following before performing any maintenance:
Park the machine on flat, level ground.
Lower the attachment to the ground.
Shut down the engine and remove the ignition key.
Lock the tracks.
Failure to comply could result in death or serious injury.

W0944D

⚠ WARNING

Tip-over hazard!
Only raise the track as little as necessary.
Failure to comply could result in death or serious injury.

W0276A

Hydraulic system

⚠ WARNING

Burn hazard!
Before performing any service on the hydraulic system, you must allow it to cool. Hydraulic fluid temperature should not exceed 40 °C (104 °F).
Failure to comply could result in death or serious injury.

W0241A

⚠ WARNING

Pressurized fluid can penetrate the skin and cause severe injuries.
The grease in the cylinder is under high pressure. Never loosen the grease fitting adaptor completely in order to speed up the flow of grease.
Failure to comply could result in death or serious injury.

W0261A

⚠ WARNING

Pressurized system!
Before attempting any service procedure, it is your responsibility to know the number of accumulators on the machine, and the correct procedure for releasing the pressure of each accumulator.
Failure to comply could result in death or serious injury.

W0136A

Battery

⚠ WARNING

Battery acid causes burns. Batteries contain sulfuric acid.
Avoid contact with skin, eyes or clothing. Antidote (external): Flush with water. Antidote (eyes): flush with water for 15 minutes and seek medical attention immediately. Antidote (internal): Drink large quantities of water or milk. Do not induce vomiting. Seek medical attention immediately.
Failure to comply could result in death or serious injury.

W0111A

⚠ WARNING

Battery gas can explode!
To prevent an explosion: 1. Always disconnect the negative (-) battery cable first. 2. Always connect the negative (-) battery cable last. 3. Do not short circuit the battery posts with metal objects. 4. Do not weld, grind, or smoke near a battery.
Failure to comply could result in death or serious injury.

W0011A

Fluids

⚠ WARNING

Hazardous chemicals!
Coolant can be toxic. Avoid contact with skin, eyes, and clothing. Antidotes:
EXTERNAL - Rinse thoroughly with water. Remove soiled clothing.
INTERNAL - Rinse the mouth with water. DO NOT induce vomiting. Seek immediate medical attention.
EYES - Flush with water. Seek immediate medical attention.
Failure to comply could result in death or serious injury.

W0282A

⚠ WARNING

Burn hazard!
Hot coolant can spray and scald if you remove the radiator or deaeration tank cap while the system is hot. To remove the cap: allow the system to cool, turn the cap to the first notch, and wait for all pressure to release. Remove the cap only after all pressure has released.
Failure to comply could result in death or serious injury.

W0367A

⚠ WARNING

Escaping fluid!
Hydraulic fluid or diesel fuel leaking under pressure can penetrate the skin and cause infection or other injury. To prevent personal injury: Relieve all pressure before disconnecting fluid lines or performing work on the hydraulic system. Before applying pressure, make sure all connections are tight and all components are in good condition. Never use your hand to check for suspected leaks under pressure. Use a piece of cardboard or wood for this purpose. If injured by leaking fluid, see your doctor immediately.
Failure to comply could result in death or serious injury.

W0178A

⚠ WARNING

Chemical hazard!
When handling fuel, lubricants, and other service chemicals, follow the manufacturer's instructions. Wear Personal Protective Equipment (PPE) as instructed. Do not smoke or use open flame. Collect fluids in proper containers. Obey all local and environmental regulations when disposing of chemicals.
Failure to comply could result in death or serious injury.

W0371A

Safety rules - Ecology and the environment

Soil, air, and water quality is important for all industries and life in general. When legislation does not yet rule the treatment of some of the substances that advanced technology requires, sound judgment should govern the use and disposal of products of a chemical and petrochemical nature.

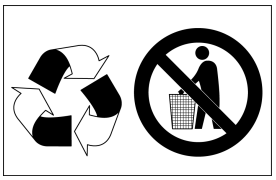
Familiarize yourself with the relative legislation applicable to your country, and make sure that you understand this legislation. Where no legislation exists, obtain information from suppliers of oils, filters, batteries, fuels, anti-freeze, cleaning agents, etc., with regard to the effect of these substances on man and nature and how to safely store, use, and dispose of these substances.

Helpful hints

- Avoid the use of cans or other inappropriate pressurized fuel delivery systems to fill tanks. Such delivery systems may cause considerable spillage.
- In general, avoid skin contact with all fuels, oils, acids, solvents, etc. Most of these products contain substances that may be harmful to your health.
- Modern oils contain additives. Do not burn contaminated fuels and or waste oils in ordinary heating systems.
- Avoid spillage when you drain fluids such as used engine coolant mixtures, engine oil, hydraulic fluid, brake fluid, etc. Do not mix drained brake fluids or fuels with lubricants. Store all drained fluids safely until you can dispose of the fluids in a proper way that complies with all local legislation and available resources.
- Do not allow coolant mixtures to get into the soil. Collect and dispose of coolant mixtures properly.
- The air-conditioning system contains gases that should not be released into the atmosphere. Consult an air-conditioning specialist or use a special extractor to recharge the system properly.
- Repair any leaks or defects in the engine cooling system or hydraulic system immediately.
- Do not increase the pressure in a pressurized circuit as this may lead to a component failure.
- Protect hoses during welding. Penetrating weld splatter may burn a hole or weaken hoses, allowing the loss of oils, coolant, etc.

Battery recycling

Batteries and electric accumulators contain several substances that can have a harmful effect on the environment if the batteries are not properly recycled after use. Improper disposal of batteries can contaminate the soil, groundwater, and waterways. NEW HOLLAND CONSTRUCTION strongly recommends that you return all used batteries to a NEW HOLLAND CONSTRUCTION dealer, who will dispose of the used batteries or recycle the used batteries properly. In some countries, this is a legal requirement.



Mandatory battery recycling

NOTE: *The following requirements are mandatory in Brazil.*

Batteries are made of lead plates and a sulfuric acid solution. Because batteries contain heavy metals such as lead, CONAMA Resolution 401/2008 requires you to return all used batteries to the battery dealer when you replace any batteries. Do not dispose of batteries in your household garbage.

Points of sale are obliged to:

- Accept the return of your used batteries
- Store the returned batteries in a suitable location
- Send the returned batteries to the battery manufacturer for recycling

Torque - Standard torque settings

BOLT AND NUT

Use following table for unspecified torque.

Coarse thread

Bolt size	Wrench	8 t	10 t
M6 x 1.0	**10 mm**	**8.34 – 12.26 N·m (6.15 – 9.04 lb ft)**	**11.12 – 17.08 N·m (8.20 – 12.60 lb ft)**

Basic instructions - Shop and assembly

Shimming

For each adjustment operation, select adjusting shims and measure the adjusting shims individually using a micrometer, then add up the recorded values. Do not rely on measuring the entire shimming set, which may be incorrect, or the rated value shown on each shim.

Rotating shaft seals

For correct rotating shaft seal installation, proceed as follows:

1. Before assembly, allow the seal to soak in the oil it will be sealing for at least thirty minutes.
2. Thoroughly clean the shaft and check that the working surface on the shaft is not damaged.
3. Position the sealing lip facing the fluid.

   NOTE: *With hydrodynamic lips, take into consideration the shaft rotation direction and position the grooves so that they will move the fluid towards the inner side of the seal.*
4. Coat the sealing lip with a thin layer of lubricant (use oil rather than grease). Fill the gap between the sealing lip and the dust lip on double lip seals with grease.
5. Insert the seal in its seat and press down using a flat punch or seal installation tool. Do not tap the seal with a hammer or mallet.
6. While you insert the seal, check that the seal is perpendicular to the seat. When the seal settles, make sure that the seal makes contact with the thrust element, if required.
7. To prevent damage to the seal lip on the shaft, position a protective guard during installation operations.

O-ring seals

Lubricate the O-ring seals before you insert them in the seats. This will prevent the O-ring seals from overturning and twisting, which would jeopardize sealing efficiency.

Sealing compounds

Apply a sealing compound on the mating surfaces when specified by the procedure. Before you apply the sealing compound, prepare the surfaces as directed by the product container.

Spare parts

Only use CNH Original Parts or NEW HOLLAND CONSTRUCTION Original Parts.

Only genuine spare parts guarantee the same quality, duration, and safety as original parts, as they are the same parts that are assembled during standard production. Only CNH Original Parts or NEW HOLLAND CONSTRUCTION Original Parts can offer this guarantee.

When ordering spare parts, always provide the following information:

- Machine model (commercial name) and Product Identification Number (PIN)
- Part number of the ordered part, which can be found in the parts catalog

Protecting the electronic and/or electrical systems during charging and welding

To avoid damage to the electronic and/or electrical systems, always observe the following practices:

1. Never make or break any of the charging circuit connections when the engine is running, including the battery connections.
2. Never short any of the charging components to ground.
3. Always disconnect the ground cable from the battery before arc welding on the machine or on any machine attachment.
   - Position the welder ground clamp as close to the welding area as possible.
   - If you weld in close proximity to a computer module, then you should remove the module from the machine.
   - Never allow welding cables to lie on, near, or across any electrical wiring or electronic component while you weld.
4. Always disconnect the negative cable from the battery when charging the battery in the machine with a battery charger.

   NOTICE: *If you must weld on the unit, you must disconnect the battery ground cable from the machine battery. The electronic monitoring system and charging system will be damaged if this is not done.*
5. Remove the battery ground cable. Reconnect the cable when you complete welding.

⚠ WARNING

Battery acid causes burns. Batteries contain sulfuric acid.
Avoid contact with skin, eyes or clothing. Antidote (external): Flush with water. Antidote (eyes): flush with water for 15 minutes and seek medical attention immediately. Antidote (internal): Drink large quantities of water or milk. Do not induce vomiting. Seek medical attention immediately.
Failure to comply could result in death or serious injury.

W0111A

Special tools

The special tools that NEW HOLLAND CONSTRUCTION suggests and illustrate in this manual have been specifically researched and designed for use with NEW HOLLAND CONSTRUCTION machines. The special tools are essential for reliable repair operations. The special tools are accurately built and rigorously tested to offer efficient and long-lasting operation.

By using these tools, repair personnel will benefit from:

- Operating in optimal technical conditions
- Obtaining the best results
- Saving time and effort
- Working in safe conditions

Machine specifications

Engine

Model	Kubota D1305
Type	4-cycle vertical overhead valve, diesel fuel
Cooling method	Water cooling
Number of cylinders and arrangement	3 cylinders, in-line
Firing order	1 - 2 - 3
Combustion chamber type	Swirl chamber type
Cylinder bore x stroke	**78 mm** (**3.07 in**) x **88 mm** (**3.46 in**)
Piston displacement	**1261 cm³** (**77 in³**)
Compression ratio	24 : 1
Rated gross horse power (SAE J1995)	**18.5 kW** (**25.2 Hp**) at **2400 RPM**
Maximum torque at **1600 RPM**	**81.4 N·m** (**60.0 lb ft**)
Engine oil quantity	**5.7 L** (**1.5 US gal**)
Dry weight	**124 kg** (**273 lb**)
High idling speed	**2350 – 2400 RPM**
Low idling speed	**1400 – 1450 RPM**
Rated fuel consumption	192 g/Hp·hr at **2400 RPM** (257 g/kW·hr at **2400 RPM**)
Starting motor	**12 V**, **1.4 kW**
Alternator	**12 V**, **40 A**
Battery	1 x **12 V** x **58 A·h** or 1 x **12 V** x **80 A·h**

Main pump

Type	Variable displacement tandem axis piston pumps
Capacity	2 x **12 cm³/rev** (**0.7 in³/rev**)
Rated oil flow	2 x **27.6 L/min** (**7.3 US gpm**)
Rated speed	**2300 RPM**

Gear pump

Type	Fixed displacement gear pump single stage
Capacity	**8.5 – 4.5 cm³/rev** (**0.5 – 0.3 in³/rev**)
Rated oil flow	**19.6 – 10.4 L/min** (**5.2 – 2.7 US gpm**)

Main control valve

Type	Sectional, 9 spools (12 blocks)
Operating method	Hydraulic pilot system
Main relief valve pressure : P1, P2 / P3	**21573 – 17161 kPa** (**3129 – 2489 psi**)
Overload relief valve pressure	**23538 kPa** (**3414 psi**)

Swing motor

Type	Fixed displacement axial piston motor
Capacity	**12.5 cm³/rev** (**0.8 in³/rev**)
Relief pressure	**16671 kPa** (**2418 psi**)
Braking system	Automatic, spring applied hydraulic released
Braking torque	**68 N·m** (**50.2 lb ft**)
Brake release pressure	**2454 – 4902 kPa** (**356 – 711 psi**)
Reduction gear type	2 - stage planetary

Travel motor

Type	Variable displacement axial piston motor
Relief pressure	**21573 kPa** (**3129 psi**)
Reduction gear type	2-stage planetary
Braking system	Automatic, spring applied hydraulic released
Brake release pressure	**1861 kPa** (**270 psi**)
Braking torque	**55.9 N·m** (**41.2 lb ft**)

Cylinder

Boom cylinder	Bore diameter x Rod diameter x Stroke	**75 mm** (**3.0 in**) x **45 mm** (**1.8 in**) x **562 mm** (**22.1 in**)
	Cushion	Extend only
Arm cylinder	Bore diameter x Rod diameter x Stroke	Ø **70 mm** (**2.8 in**) x Ø **45 mm** (**1.8 in**) x **500 mm** (**19.7 in**)
	Cushion	Extend and retract
Bucket cylinder	Bore diameter x Rod diameter x Stroke	Ø **60 mm** (**2.4 in**) x Ø **35 mm** (**1.4 in**) x **420 mm** (**16.5 in**)
	Cushion	-
Boom swing cylinder	Bore diameter x Rod diameter x Stroke	Ø **75 mm** (**3.0 in**) x Ø **40 mm** (**1.6 in**) x **400 mm** (**15.7 in**)
	Cushion	-
Dozer cylinder	Bore diameter x Rod diameter x Stroke	Ø **85 mm** (**3.3 in**) x Ø **45 mm** (**1.8 in**) x **140 mm** (**5.5 in**)
	Cushion	-

NOTE: *discoloration of cylinder rod can occur when the friction reduction additive of lubrication oil spreads on the rod surface.*
Discoloration does not cause any harmful effect on the cylinder performance.

Types of shoes – Cab version

Shoe width	**250 mm** (**9.8 in**)
Ground pressure	**31.7 kPa** (**4.6 psi**)
Overall width	**1500 mm** (**59.1 in**)

Types of shoes – Canopy version

Shoe width	**250 mm** (**9.8 in**)
Ground pressure	**29.6 kPa** (**4.3 psi**)
Overall width	**1500 mm** (**59.1 in**)

Number of rollers and shoes on each side

Upper roller	1
Lower roller	3

Weights

Machine

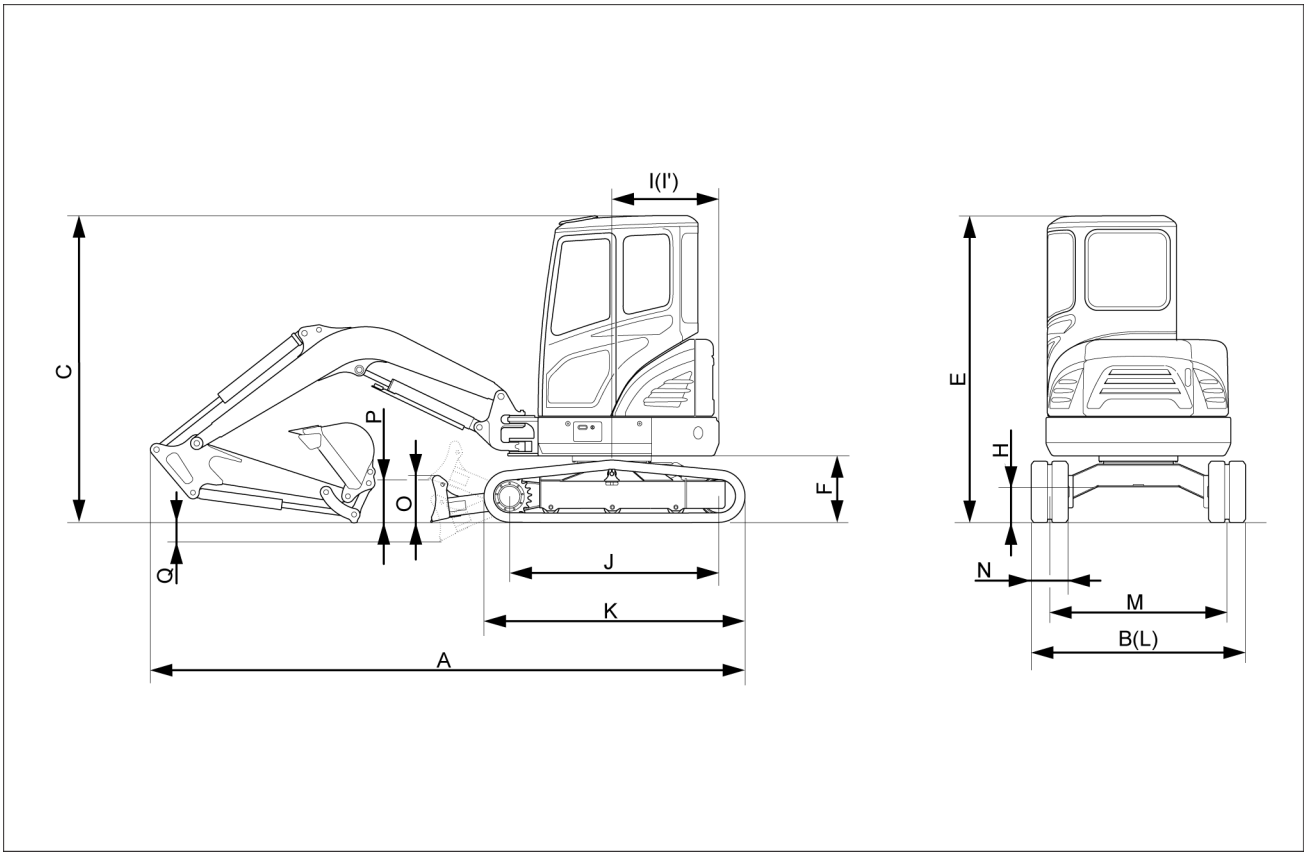
Operating weight – Cab version (standard boom, arm, bucket, lubricant, coolant, full fuel, full hydraulic, without quick coupler, rubber track)	**2580 kg** (**5688 lb**)
Operating weight – Canopy version (standard boom, arm, bucket, lubricant, coolant, full fuel, full hydraulic, without quick coupler, rubber track)	**2430 kg** (**5357 lb**)

Components

Upperstructure assembly	**979 kg** (**2158 lb**)
Main frame weld assembly	**305 kg** (**672 lb**)
Engine assembly	**124 kg** (**273 lb**)
Main pump assembly	**19 kg** (**42 lb**)
Main control valve assembly	**25 kg** (**55 lb**)
Swing motor assembly	**34 kg** (**75 lb**)
Hydraulic oil tank assembly	**50 kg** (**110 lb**)
Fuel tank assembly	**30 kg** (**66 lb**)
Boom swing post	**65 kg** (**143 lb**)
Counterweight	**117 kg** (**258 lb**)
Cab assembly	**210 kg** (**463 lb**)
Lower chassis assembly	**828 kg** (**1825 lb**)
Track frame weld assembly	**220 kg** (**485 lb**)
Swing bearing	**47 kg** (**104 lb**)
Travel motor assembly	**36 kg** (**79 lb**)
Turning joint	**11 kg** (**24 lb**)
Track recoil spring	**16 kg** (**35 lb**)
Idler	**20 kg** (**44 lb**)
Carrier roller	**3 kg** (**7 lb**)
Track roller	**10 kg** (**22 lb**)
Sprocket	**7 kg** (**15 lb**)
Rubber track (**250 mm** (**9.8 in**))	**112.7 kg** (**248.5 lb**)
Dozer blade assembly	**92 kg** (**203 lb**)
Front attachment assembly (**1.945 m** (**76.6 in**) boom, **1.12 m** (**44.1 in**) arm, **0.07 m³** (**0.09 yd³**) SAE heaped bucket)	**318 kg** (**701 lb**)
1.945 m (**76.6 in**) boom assembly	**80 kg** (**176 lb**)
1.12 m (**44.1 in**) arm assembly	**45 kg** (**99 lb**)
0.07 m³ (**2.47 ft³**) SAE heaped bucket	**57 kg** (**126 lb**)
Boom cylinder assembly	**26 kg** (**57 lb**)
Arm cylinder assembly	**26 kg** (**57 lb**)
Bucket cylinder assembly	**20 kg** (**44 lb**)
Bucket control link assembly	**20 kg** (**44 lb**)
Dozer cylinder assembly	**21 kg** (**46 lb**)
Boom swing cylinder assembly	**23 kg** (**51 lb**)

Dimensions

Cab version

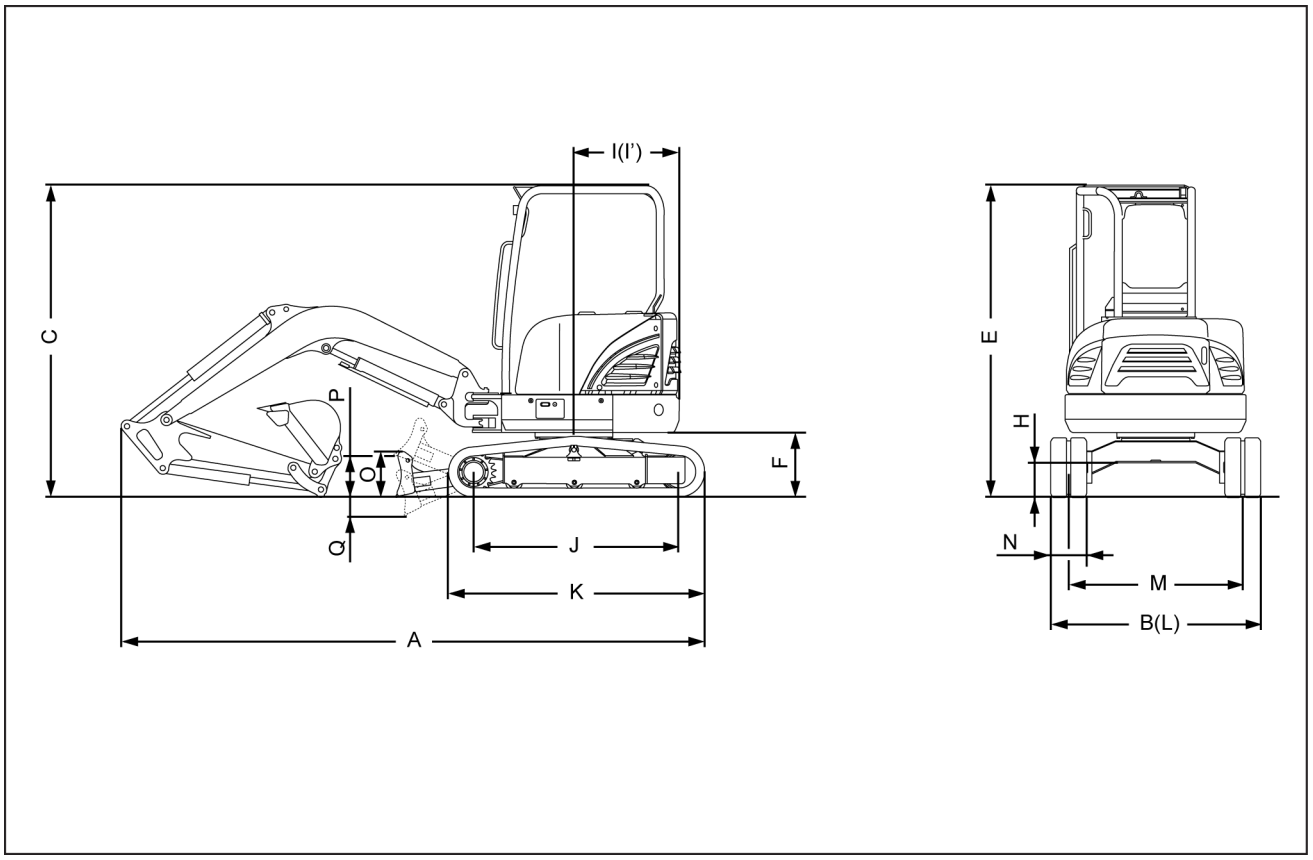


SMIL16MEX0048FA 1

(A) Overall length	**4030 mm** (**158.7 in**)
(B) Overall width, with **250 mm** (**9.8 in**) shoe	**1500 mm** (**59.1 in**)
(C) Overall height	**2500 mm** (**98.4 in**)
(E) Overall height of cab	**2500 mm** (**98.4 in**)
(F) Ground clearance of counterweight	**510 mm** (**20.1 in**)
(H) Minimum ground clearance	**290 mm** (**11.4 in**)
(I) Rear-end distance	**775 mm** (**30.5 in**)
(I') Rear-end swing radius	**775 mm** (**30.5 in**)
(J) Distance between tumblers	**1490 mm** (**58.7 in**)
(K) Undercarriage length	**1910 mm** (**75.2 in**)
(L) Undercarriage width	**1500 mm** (**59.1 in**)
(M) Track gauge	**1250 mm** (**49.2 in**)
(N) Track shoe width, standard	**250 mm** (**9.8 in**)
(O) Height of blade	**300 mm** (**11.8 in**)
(P) Ground clearance of blade up	**330 mm** (**13.0 in**)
(Q) Depth of blade down	**380 mm** (**15.0 in**)

Boom length: **1.945 m** (**76.575 in**)
Arm length: **1.120 m** (**44.094 in**)
With boom swing post

Canopy version

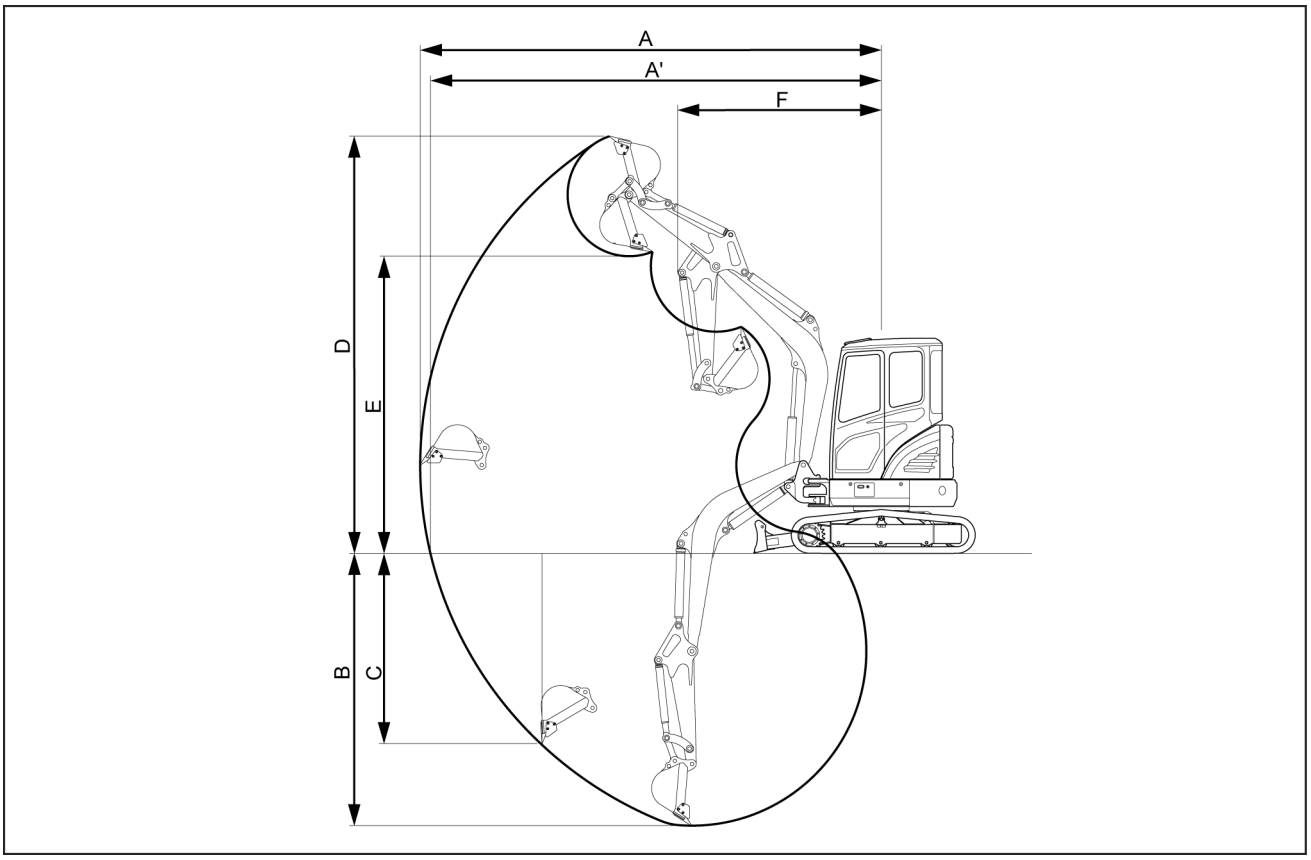


SMIL16MEX1545FA 2

(A) Overall length	**4030 mm** (**158.7 in**)
(B) Overall width, with **250 mm** (**9.8 in**) shoe	**1500 mm** (**59.1 in**)
(C) Overall height	**2500 mm** (**98.4 in**)
(E) Overall height of cab	**2500 mm** (**98.4 in**)
(F) Ground clearance of counterweight	**510 mm** (**20.1 in**)
(H) Minimum ground clearance	**290 mm** (**11.4 in**)
(I) Rear-end distance	**775 mm** (**30.5 in**)
(I') Rear-end swing radius	**775 mm** (**30.5 in**)
(J) Distance between tumblers	**1490 mm** (**58.7 in**)
(K) Undercarriage length	**1910 mm** (**75.2 in**)
(L) Undercarriage width	**1500 mm** (**59.1 in**)
(M) Track gauge	**1250 mm** (**49.2 in**)
(N) Track shoe width, standard	**250 mm** (**9.8 in**)
(O) Height of blade	**300 mm** (**11.8 in**)
(P) Ground clearance of blade up	**330 mm** (**13.0 in**)
(Q) Depth of blade down	**380 mm** (**15.0 in**)

Boom length: **1.945 m** (**76.575 in**)
Arm length: **1.120 m** (**44.094 in**)
With boom swing post

Working range



SMIL16MEX0049FA 3

(A) Maximum digging reach		**4480 mm** (**176.4 in**)
(A') Maximum digging reach on ground		**4340 mm** (**170.9 in**)
(B) Maximum digging depth		**2420 mm** (**95.3 in**)
(C) Maximum vertical wall digging depth		**1460 mm** (**57.5 in**)
(D) Maximum digging height		**4150 mm** (**163.4 in**)
(E) Maximum dumping height		**2930 mm** (**115.4 in**)
(F) Minimum swing radius		**1980 mm** (**78.0 in**)
Boom swing radius (left-hand/right-hand)		**75°** / **50°**
Bucket digging force	SAE	**19.2 kN** (**4316.3 lb**)
	ISO	**21.1 kN** (**4743.5 lb**)
Arm crowd force	SAE	**14.2 kN** (**3192.3 lb**)
	ISO	**14.6 kN** (**3282.2 lb**)

Boom length: **1.945 m** (**76.575 in**)
Arm length: **1.120 m** (**44.094 in**)
With boom swing post

Hydraulic contamination

Contamination in the hydraulic system is a major cause of the malfunction of hydraulic components. Contamination is any foreign material in the hydraulic oil.

Contamination can enter the hydraulic system in several ways:

- When you drain the oil or disconnect any line
- When you disassemble a component
- From normal wear of the hydraulic components
- From damaged seals or worn seals
- From a damaged component in the hydraulic system

All hydraulic systems operate with some contamination. The design of the components in this hydraulic system permits efficient operation with a small amount of contamination. An increase in this amount of contamination can cause problems in the hydraulic system.

The following list includes some of these problems:

- Cylinder rod seals that leak
- Control valve spools that do not return to neutral
- Movement of control valve spools is difficult
- Hydraulic oil that becomes too hot
- Pump gears, housing, and other parts that wear rapidly
- Relief valves or check valves held open by dirt
- Quick failure of components that have been repaired
- Slow cycle times are slow. The machine does not have enough power.

If your machine has any of these problems, check the hydraulic oil for contamination.

There are two types of contamination: microscopic and visible.

Microscopic contamination occurs when very fine particles of foreign material are suspended in the hydraulic oil. These particles are too small to see or feel. Microscopic contamination can be found by identification of the following problems or by testing in a laboratory.

Examples of problems caused by microscopic contamination:

- Cylinder rod seals that leak
- Control valve spools that do not return to neutral
- The hydraulic system has a high operating temperature

Visible contamination is foreign material that can be found by sight, touch, or odor. Visible contamination can cause a sudden failure of components.

Examples of problems caused by visible contamination:

- Particles of metal or dirt in the oil
- Air in the oil
- Dark or thick oil
- Oil with an odor of burned oil
- Water in the oil

If you find contamination, use a portable filter to clean the hydraulic system.

General specification

Biodiesel usage in NEW HOLLAND CONSTRUCTION products

Introduction to Fatty Acid Methyl Ester (FAME) biodiesel

FAME biodiesel, called biodiesel fuel in the following section, consists of a family of fuels derived from vegetable oils treated with methyl esters.

There are two main biodiesel fuel types: Rapeseed Methyl Ester (RME) and Soybean Methyl Ester (SME). RME is a blend of rapeseed and sunflower methyl ester, and is the preferred crop in Europe. SME is the preferred crop in the United States.

Biodiesel fuel is a renewable alternative fuel source. Its use and development is promoted worldwide, especially in Europe and in the United States.

NOTICE: *Your emissions control system is compatible with up to **5%** biodiesel fuel (B5). Be aware that the use of biodiesel fuel that does not comply with the standards mentioned in this section could lead to severe damage to the engine, fuel system or after treatment system of your machine. The use of non-approved fuels may void NEW HOLLAND CONSTRUCTION Warranty coverage.*

Biodiesel fuel can be used to run diesel engines as pure biodiesel fuel or when blended with standard diesel fuel:

- B5 : indicates the blend of **5%** biodiesel and **95%** diesel fuels.

NOTICE: *Never use biodiesel blends higher than B5.*

Biodiesel fuel has several positive features in comparison with diesel fuel:

- Biodiesel fuel adds lubricity to the fuel, which is beneficial in many circumstances, particularly as sulfur and aromatics are removed from the fuel.
- Biodiesel has a greater cetane number and burns cleaner.
- Biodiesel produces less particulate matter and reduces smoke emissions.
- Biodiesel is fully biodegradable and non-toxic.

Diesel and biodiesel fuel specifications

TIER 4 FINAL diesel fuel specifications are covered by the following:

- **ASTM D975**, Standard Specification for Diesel Fuel Oils. (15 ppm sulfur maximum.)

Biodiesel blends are covered by:

- United States Diesel Fuel Specification **ASTM D975** allows up to **5%** biodiesel since 2009. United States fuel suppliers are allowed to use up to **5%** biodiesel fuel (B5) to supply the network.
- United States Biodiesel Fuel Specification **ASTM D7467** provides specifications for biodiesel blends from B6 to B20.

Pure biodiesel (B100) specification is covered by the following requirements:

- **ASTM D6751** - Standard specification for biodiesel fuel blend stock (B100) for middle distillate fuels.

Before raw oil can be converted into usable biodiesel fuel, it must undergo transesterification to remove glycerides. During the transesterification process, the oil reacts with an alcohol to separate the glycerine from the fat or vegetable oil. This process leaves behind two products: methyl ester (the chemical name for biodiesel) and glycerine (a byproduct usually sold for use in soaps or other products).

NOTICE: *Biodiesel fuels approved for use in the NEW HOLLAND CONSTRUCTION equipment must be transesterified and comply with the North America Standard **ASTM D6751**.*

NOTICE: *Cold Pressed Biodiesel, Cold Pressed Oil, Straight Vegetable Oil (SVO), or more generally unrefined vegetable oils used as motor fuel, are fuels that are normally made from Rapeseed oil or similar high oil content crops. These kinds of fuel are not transesterified, so they do not fulfil the **ASTM D6751** requirements. There is no recognized quality standard available for these types of fuel. Therefore the use of Cold Pressed Biodiesel, Cold Pressed*

Oil, Straight Vegetable Oil (SVO), or more generally unrefined vegetable oils used as motor fuel are NOT APPROVED at any blend in any NEW HOLLAND CONSTRUCTION product.

***NOTICE:** Any engine and fuel injection equipment fitted to a NEW HOLLAND CONSTRUCTION vehicle found to have run with any blend of NON-APPROVED fuel (fuel not fulfilling the specification described in the requirement **ASTM D6751**) will no longer be covered for Warranty by NEW HOLLAND CONSTRUCTION.*

Biodiesel fuel usage conditions

You must stringently follow the biodiesel fuel usage conditions. Incorrect application of the biodiesel fuel usage conditions could lead to severe damage to the engine, fuel injection equipment and aftertreatment system.

The main concerns related to operation with biodiesel fuels are:

- Filters and injector blockage caused by poor fuel quality.
- Wear and corrosion of internal components due to water content, which affects lubricity.
- Deterioration of some rubber sealing compounds in the fuel system.
- Biodiesel oxidation, which can lead to the formation of deposits that can harm the fuel injection system.

***NOTICE:** Any problem in the engine fuel injection equipment associated with non-compliance to the following conditions for biodiesel fuel handling and maintenance will not be covered for Warranty by NEW HOLLAND CONSTRUCTION.*

Purchase biodiesel fuel from a trusted supplier who understands the product and maintains acceptable fuel quality. It is highly recommended that you use biodiesel from BQ 9000 accredited suppliers to maintain the quality and consistency of the fuel. The BQ 9000 Quality Management Program is accredited by the National Biodiesel Board for producers and marketers of biodiesel fuel. See the National Biodiesel Board website at www.biodiesel.org for more information.

Storage

The machine should not be stored for long periods without changing the diesel fuel in the fuel system.

***NOTICE:** Biodiesel is highly hygroscopic and tends to collect water more than diesel fuel. This increases the risk of algae and bacteria growth which can cause severe damage to the fuel injection system. Keep the machine fuel tanks and on-site storage tanks as full as possible to limit the amount of air and water vapors inside the tank. Drain water from the tanks at least once a week.*

If the machine should be stored for long periods, make sure to replace the diesel fuel every three months at most.

Fluids and lubricants

By using appropriate fluids and lubricants the excavator can operate in ambient temperatures ranging from **-15 °C** (**-4 °F**) to **45 °C** (**113 °F**).

NOTICE: *when operating the machine in ambient temperatures outside the above mentioned range, consult your NEW HOLLAND CONSTRUCTION dealer for specific machine provision and for specific fluids and lubricants to be used.*

System	Quantity	Fluid	NEW HOLLAND CONSTRUC-TION specifica-tion	Reference specification
Fuel tank	**30 L** (**7.9 US gal**)	—	—	**ASTM D975** **EN 590**
Engine oil	**5.7 L** (**1.5 US gal**)	**NEW HOLLAND AMBRA MASTER-GOLD™ HSP ENGINE OIL CI-4 SAE 15W-40**	NH 330H	**SAE 15W-40** **ACEA E7/E5** **API CI-4**
Travel reduction unit	**0.6 L** (**0.16 US gal**) x2	**NEW HOLLAND AMBRA HYPOIDE 90**	**MAT3511**	**SAE 80W90** **API GL-5**
Engine coolant	**5 L** (**1.3 US gal**)	**NEW HOLLAND AMBRA ACTIFULL™ OT EXTENDED LIFE COOLANT** CONCENTRATE (**)	**MAT3624** Grade OAT-EG1	**ASTM D6210** TYPE I-FF
		NEW HOLLAND AMBRA ACTIFULL™ OT EXTENDED LIFE COOLANT 50/50 PREMIXED	**MAT3624** Grade OAT-EG2	**ASTM D6210** TYPE III-FF
Hydraulic oil tank (*)	**27 L** (**7.1 US gal**)	NEW HOLLAND AMBRA HYDRAULIC LL 46	—	**ISO 11158** L-HV46
Grease (Attachment)	—	**NEW HOLLAND AMBRA GR 75 MD**	**MAT3550**	**NLGI 2**
Grease (Swing bearing)	—	**NEW HOLLAND AMBRA GR-9 MULTI-PURPOSE GREASE**	**MAT3550** Grade A	**NLGI 2**

(*) The total capacity of the hydraulic system is **55 L** (**14.5 US gal**).

(**) Concentrate antifreeze to be mixed 50/50 with distilled (deionized) water.

Engine coolant

NEW HOLLAND CONSTRUCTION requires the use of a fully formulated Organic Acid Technology (OAT) based coolant. **NEW HOLLAND AMBRA ACTIFULL™ OT EXTENDED LIFE COOLANT** is the reference genuine product.

NOTICE: *use of different coolant brands is not recommended.*

NOTICE: *never add Supplemental Coolant Additives (SCA) when using* ***NEW HOLLAND AMBRA ACTIFULL™ OT EXTENDED LIFE COOLANT****.*

NOTICE: *never mix* ***NEW HOLLAND AMBRA ACTIFULL™ OT EXTENDED LIFE COOLANT*** *coolant with conventional coolant. Mixing OAT based coolant with conventional coolant will reduce the effectiveness of OAT coolant.*

NOTICE: *if only conventional coolant is available, a complete changeover of the fluid into the cooling system shall be carried out.*

the engine cooling system shall always be refilled with coolant solution made by mixture of antifreeze and distilled (deionized) water.

NOTICE: *never refill the cooling system with only antifreeze. Never refill the cooling system with only water.*

Using **NEW HOLLAND AMBRA ACTIFULL™ OT EXTENDED LIFE COOLANT**, a 50/50 mixture of antifreeze and distilled (deionized) water grants proper performance of the engine cooling system in the above mentioned operating temperature range of the machine.

NEW HOLLAND AMBRA ACTIFULL™ OT EXTENDED LIFE COOLANT is available as:

- 50/50 PREMIXED coolant solution ready for usage.
- CONCENTRATE antifreeze to be mixed 50/50 with distilled (deionized) water.

NOTICE: *if operating in extreme winter climate, a coolant solution made by 60/40 antifreeze/distilled (deionized) water mixture shall be used in order to grant proper performance of the engine cooling system.*

NOTICE: *never use coolant solution with more than* ***60%*** *of antifreeze. This affects the cooling capacity of the mixture.*

When the coolant solution is prepared starting from the CONCENTRATE product, the antifreeze concentration in the mixture of antifreeze and distilled (deionized) water can be determined with a refractometer designed to measure ethylene glycol content.

If distilled (deionized) water is not available, use water for dilution with the following properties:

Property	Maximum limit
Total Solids	**340 ppm**
Total Hardness	**340 ppm**
Chloride (Cl)	**340 ppm**
Sulfate (SO4)	**100 ppm**
Acidity pH	5.5 to 9.0

NOTICE: *never use hard water, sea water and softened sea water that has been conditioned with salt. The minerals and salts present in potable water can cause corrosion and deposits resulting in shortened engine life.*

Fuel

For Europe only: use only Ultra-Low Sulphur Diesel (S10) that meets **EN 590** specifications.

For North America only: use only No. 2-D Ultra-Low Sulphur Diesel (S15) that meets **ASTM D975** specifications.

Using other types of fuel may lead to stalled engine output or deterioration in fuel economy.

NOTICE: *the warranty shall be invalid if any serious defect is caused by usage of any other fuel. Using fuel other than recommended may cause damage to the fuel injection pump, injector, and other fuel supply system or the engine. NEW HOLLAND CONSTRUCTION may not be responsible to any of such damages.*

If the temperature drops below the fuel cloud point, output deficiency or engine start problems may occur due to wax crystals.

For North America only: during cold weather, lower than **-7 °C** (**19.4 °F**), it is temporarily acceptable to use a mixture of No. 1-D (S15) and No. 2-D (S15).

NOTICE: *if operating in severe winter climate, consult the fuel supplier or the NEW HOLLAND CONSTRUCTION dealer for specific diesel fuel to be used.*

The diesel fuel to be used on the machine shall:

- be free from dust particles, even minute ones.
- have the proper viscosity.
- have a high cetane number.
- present great fluidity at low temperatures.
- have low sulphur content.
- have very little residual carbon.

NOTICE: *never use a mix of diesel fuel and old engine oil. The fuel injection system and the exhaust after treatment system will be severely damaged.*

NOTICE: *consult the fuel supplier or the NEW HOLLAND CONSTRUCTION dealer regarding appropriate use of fuel additives.*

NOTICE: *in order to prevent condensation during cold weather, fill the fuel tank to full after completing the day's work.*

Fuel storage:

Long storage can lead to the accumulation of impurities and condensation in the fuel. Engine trouble can often be traced to the presence of water in the fuel. The storage tank must be placed outside and the temperature of the fuel should be kept as low as possible. Drain off water and impurities regularly.

Disposal of fluids, lubricants, and spare parts

Fluids, lubricants and spare parts used on the machine are not fully compatible with the environment. Make sure to carry out all maintenance operations using appropriate tools, in order to avoid any risk of damaging the environment.

NOTE: *for example, make sure that the receptacle for collecting oil to be replaced is not leaking.*

Never spread fluids or lubricants on the ground or into water. Consult the NEW HOLLAND CONSTRUCTION dealer or the Local Environmental Agency in order to obtain information on the correct method of disposing fluids and lubricants used on the machine.

Never throw away spare parts as filters or batteries. Consult the NEW HOLLAND CONSTRUCTION dealer or the Local Environmental Agency in order to obtain information on the correct method of disposing filters, batteries or other spare parts used on the machine.

Product identification

Your machine is a hydraulic excavator. It consists of an undercarriage fitted with tracks and a swing bearing which supports the upper-structure frame. The upper-structure frame supports the attachment at the front end of the machine, plus the engine, hydraulics and the cab/canopy. When the operator works the controls, the engine-driven pump delivers hydraulic fluid to the control valves. The control valves distribute the hydraulic fluid to the various cylinders and hydraulic motors employed. A cooling system maintains the hydraulic fluid at normal operating temperature.
